## Conclusion

Summary of Research,  
Future work

1

# Introduction

Background & Motivation, Problem  
Statement

# Background & Motivation

# 28.64%

Increase in crime rate for the year 2020. 2019 only saw a 1.19% increase

# Crime in Little Rock

Little Rock crime 2020

# Crime Prediction methods

01

Confusion Matrix

02

Geo Mapping

03

Analysis of human  
mobility flows

04

Clustering

# About K-Means clustering

## Unlabeled Data

Used to find several hidden patterns in data

## Visualization

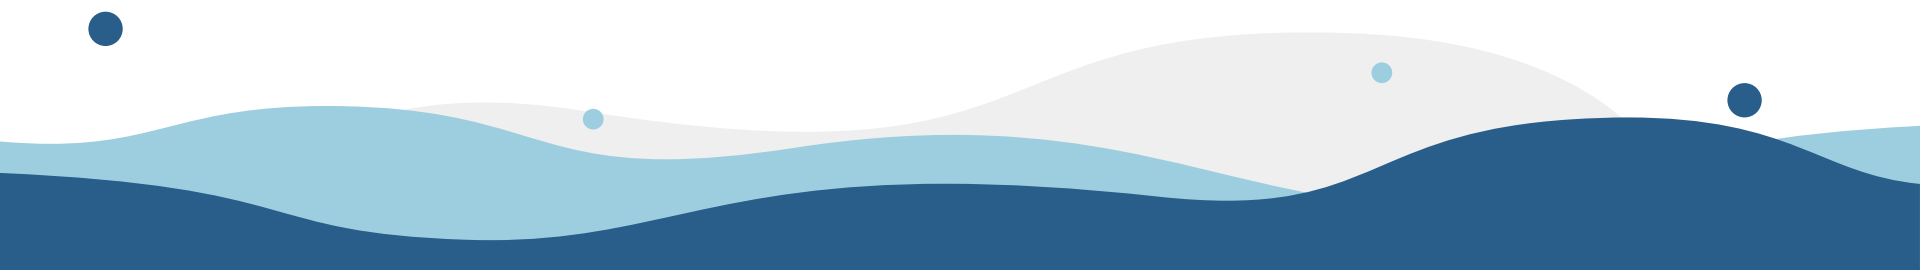

Previous research lacks good visuals

# Problem Statement:

*Crime rates are increasing, and the use of K-means clustering in crime prediction as a visualization tool is often overlooked*

2

# Contribution

Research objectives

# Purpose of Research:

## Research Objectives

1. To display in detail which areas of Little Rock have the most occurrences of crime with the use of k-means
2. To predict which areas should see an increase in law enforcement.
3. To show which type of crimes are most common in the city of Little Rock.

## Research Contributions

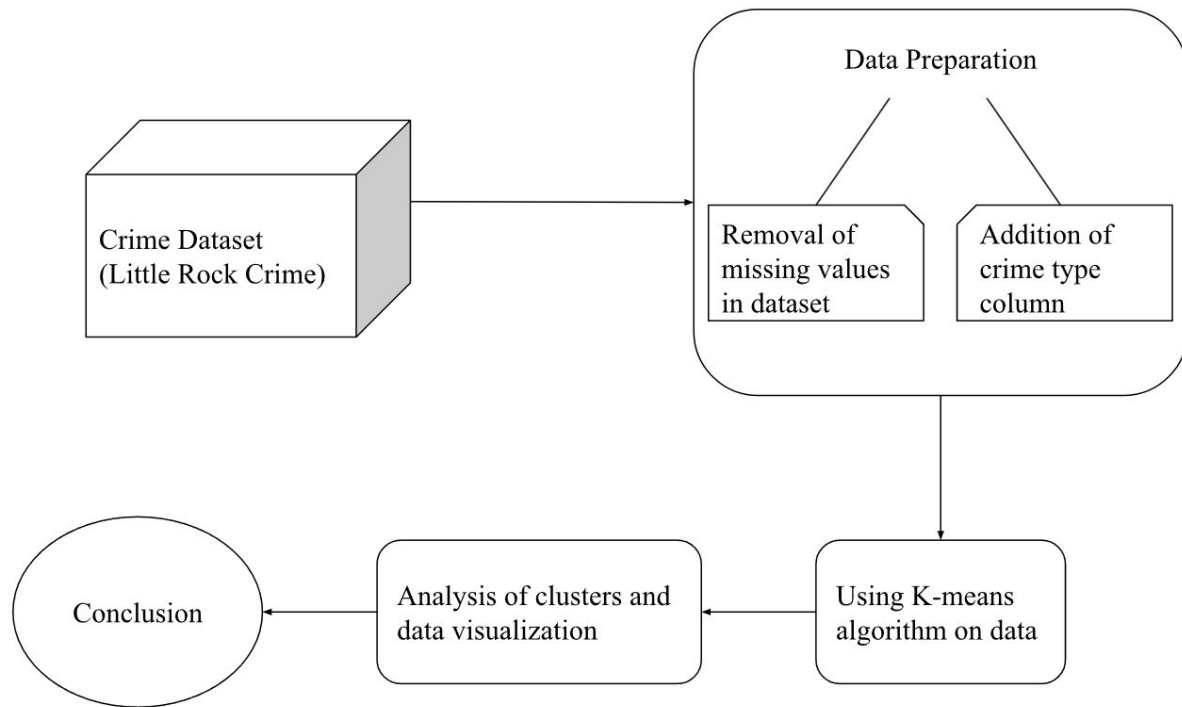

- A map showcasing which areas in Little Rock have the most occurrences of crime
- Dataset analysis of which type of crimes are most frequent in the city
- Possible prevention of crime and reduced crime rates in the city of Little Rock, AR.

3

# Methodology

Experimental Setup

# Experimental Setup

## 01 Dataset

94584 rows of violent and property crimes

## Preprocessing 03

Missing value removal and addition of columns

## 02 Tool Used

Python language in the Google Colab environment

## Validity measure 04

Use of Elbow method and Silhouette analysis to find K

The Elbow Method showing the optimal k

Silhouette analysis For Optimal k

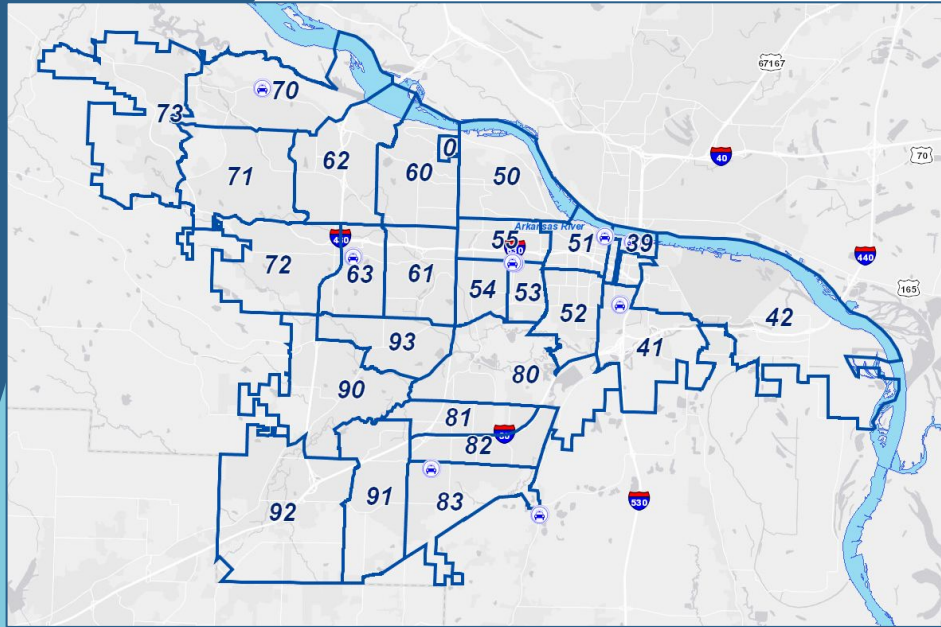

4

# Analysis and Results

## Police Patrol Districts

## Clusters

Clusters	Total Entries	Distributed percentages			
		<i>Violent Crime</i>			
		<i>Murder &amp; nonnegligent manslaughter</i>	<i>Theft with weapon</i>	<i>Aggravated Assault</i>	<i>Non-Violent Theft without weapon</i>
Cluster 1	1056	0.1	3	17.5	79.4
Cluster 2	18879	0.3	2.7	19.8	77.1
Cluster 3	19198	0.6	3.7	26.5	69.1

HOWTODRAWFORKIDS.COM

5

# Conclusion

Summary & Future Work

## Summary

Cluster 3 is the most dangerous (southeast and center) and Cluster 1 is the safest (northwest). An increase in law enforcement in Cluster 3 is likely to prevent crime in the city.

## Future Work

Future research should focus on using multiple clustering strategies and on research on different cities/countries.
